OsMADS50/DTH3 (Os03g0122600) — flowering date and photosensitivity by genotype of SNPs in the gene (n=278 accessions; 164 SNPs, MAF>=0.05)

Each point = one accession (green = photosensitive, orange = non-photosensitive); box = quartiles, thick line = median; violin if n>=10, box if n>=3; ALT = allele differing from Nipponbare reference. ANOVA/KW on flowering date over genotype groups with n>=3; lower bar = fraction photosensitive (green); chi-square/Fisher/permutation test of photosensitivity vs genotype. Unadjusted for population structure (exploratory). Stars on ANOVA: * p<0.05, ** p<0.01, *** p<0.001, **** p<0.0001, ns = not significant (raw p).
